**Subject:** re: Sarasota/Manatee Florida

I was surprised and disappointed to see that the EPA is will to endanger the clean waters and land in this area. We are living in a time when we need to preserve as much natural land/water as possible. The destruction of the land will have serious consequences (including major damage to natural animal habitats, water absorption area for heavy rains, etc. to prevent flooding.

I could go on and on, but truly this is an environmental disaster.

I don't know if you have been here to understand the environmental sensitivity of the area.

Please do NOT cOntinue along this damaging path.

Sincerely,

Ex. 6 Personal Privacy (PP)
